

## **ACKNOWLEDGEMENT**

It gives us an immense pleasure in submitting the project report on “ANDRIOD PERSONAL SCHEDULING”, and getting the opportunity of highlighting a fraction of knowledge, acquired during our technical education through this project.

This project would not have been successful without enlightened ideas, timely suggestion and keen interest of our respected Guide ***Prof. S. U. Bohra*** without her best guidance this would have been an impossible task to complete. Being on the same line, we all express our deep sense of gratitude towards Head of Department ***Prof. N. R. Chopde*** for his most valuable guidance provided to us.

We would like to thank ***Dr. P. V. Ingole***, Principal of our institution for providing necessary facility during the period of working on this project work.

We are also very thankful to all staff members of Computer Science & Engineering Department, whose encouragement and suggestions helped us to complete the project work.

Last but not the least; we would like to express our thankfulness to our friends and all our well-wishers.

## **ABSTRACT**

Whether you are a home user, student or professional, it is always important to keep and organize important information, dates and events. Android Personal Scheduler is mobile reminder software that helps you manage different kinds of information with ease and efficiency. Android Personal Scheduler comes with lots of useful features, allowing you to save your time, increase productivity and focus on your job.

Android application that can remind us of any event/Task we mark on it. It can be like reminding us about a meeting, time to pay any bill or a To-Do task. The application can take from the user the event name, date and time of the events, Stores the details to the database and alert the user at the time of event. Simple Android Application that can be used as a “reminder” for a specific type of event.

Users will also be able to add, delete or modify the schedules for events from a Web site which will be delivered to the phone via the web service.
